Description

The StudioLive 32S is a powerful 32-channel mixer that provides the ultimate mixing experience, packing extensive format features into a small format chassis. Powered by the dual-core PreSonus FLEX DSP Engine, the StudioLive 32S digital mixer is equipped with 40 mixing channels, 26 mix buses, and 286 simultaneous processors—including four stereo reverberation systems, and Fat Channel plug-in models on every input channel and mix bus. With 128 (64x64) channels of USB recording, 128 channels of AVB network audio I/O, flexible routing options, and studio-grade audio quality, the StudioLive 32S delivers a fast and intuitive,

surface-driven workflow for total control. Spend less time menu-diving and more time mixing—hands-on.

The StudioLive 32S digital mixer and the (optional) complete PreSonus® StudioLive Series III ecosystem of AVB networking products allow you to create a system that is truly customized for your needs. Connect NSB-series stage boxes to add remote analog inputs and outputs wherever they're required. Network with a StudioLive Series III rack mixer and add a dedicated monitor mixer. Add EarMix 16M personal monitor mixers to give your musicians their own customizable 16-channel monitor mixes. Multiple StudioLive Series III digital mixers can be networked, allowing you to route audio to and from any device on the audio network, thanks to the flexibility of Digital Patching onboard your StudioLive 32S digital mixer and in UC Surface remote mixer software.

PreSonus StudioLive 32S 32-Channel Digital Mixer features:

- Powered by the new quad-core PreSonus FLEX DSP Engine to provide the most processing of any digital mixer in its class
- 40 input-channel digital mixer with 33 touch-sensitive motorized faders
- 26 mix buses
- 286 simultaneous processors
- State Space-Modeled Fat Channel compressor and EQ plug-ins available on every input channel and output bus
- FLEX FX multi-effects processor with four slots to load legendary reverb emulations and delays with four dedicated effects buses
- 24 DCAs to control groups of channels
- 128-channel (64x64) recording over USB
- Onboard multi-channel SD recorder (34x34) with true Virtual Soundcheck mode
- AVB Networking on board (64x64) to connect with other mixers, NSB-series stage boxes, EarMix 16M personal monitor mixers and more
- User Profiles for managing multiple operators with custom permissions
- Per-channel digital patching from any analog, AVB, USB, or SD Card source
