Description

Inheriting the many merits of top-of-the-line Yamaha handmade flutes, these models offer rich, nuanced tonality over a wide dynamic range. The 500 and 600 series combine the brilliance of nickel silver with the characteristic mellow timbres of sterling silver, while the 700 series delivers warmth and expressive color that only the finest silver flutes can provide. All models come with hand-finished headjoints based on the Type A headjoints supplied with the 800 and 900 series handmade flutes. The keys feature traditional pointed key

arms, reflecting the highest level of craftsmanship and adding visual elegance to these outstanding instruments.

Headjoint

Based on the Handmade Flute's Type A design which offers a wider expressive range, the hand-finished headjoint on Yamaha professional flutes additionally offers easier response and excellent balance over the instrument's entire range.

Keys

The keys are hand-assembled and meticulously balanced for a perfect touch, and the key shapes have been so exquisitely designed and ergonomically placed that the flute will almost 'disappear' in your hands. Performances will feel effortless and natural.

Pointed Key Arms

A#, F# and other non-fingered keys feature pointed key arms, similar to those found on Handmade Flutes. Their beautiful designs are inspired by traditional European styling.

Case

The compact case provides ease of transport and excellent protection from damage. All Yamaha professional flutes come with an elegantly designed case cover.
