Description

Fun Foundations for Recorder Teacher Book Bundle

Teacher books and CDs, Volumes 1 and 2

By Artie Almeida

Music arranged by Paul Jennings

Grades 3-5

Volume 1 will tell you how Artie Almeida integrates recorders into her elementary school music program. The information is taken from Recorder Classroom magazine. The student pages are reproducible. A site is given where you can download many resources that go along with the games and activities in this volume.

Volume 2 picks up where Fun Foundations for Recorder Vol. 1 (item# [841612](#)) left off. Ideas are given to help you grow your program to a higher level of fluency and musicality. Artie has students work on extending range, managing the air and playing in different meters. She shares her thoughts on using the recorder in performance ensembles. Collage-style groups are discussed and some ideas from other teachers across the country are shared. Artie also has included more recorder and music theory games, like Recorder Relay, Living Tic-Tac-Toe, and Face the Music.

To view a listing of each book's contents, please visit the item pages for Book 1 (item# [841612](#)) and Book 2 (item# [843203](#)).

Permission is given to duplicate the reproducible student pages for use with your students.
