Description

The Remo NSL HK-1350-NS Not So Loud (NSL) Mallets are created to produce less sound when struck on the drum surface. One pair of NSL Mallets come with each NSL Tubano drum and are also available separately as a pair. These light weight mallets are made of a pine wood shaft and a soft spongy foam head covered with durable fabric. NSL Mallets can be used on Remo products like the 100 and 50 Series Tubanos to reduce the

volume.
